Where did the year go, as in years past our Chapter/Lodge has had several memorable events Gray Ghost, Mohegan Sun, Americade, Cop's Run, Diner Rides, Christmas Holiday party, Bike Raffle with too many rides to mention.. This past year Chet Clark added a variety to our old pizza night with buffalo wings, spaghetti, chili cook off and other culinary delights. I would like to take a moment to thank all the members and their families who step up time and time again to make this club a success.

Please remember our own Brother and Sister Law Enforcement Officers who will be working during this upcoming Holiday Season. Please keep them and their families in your thoughts and prayers. God bless them all.

As a reminder don't forget project "BLUE LIGHT" this holiday season. The idea is to display a blue light in one or more of your windows to honor those men and women in Law Enforcement who have given their lives in the performance of their duties and to honor those men and women who continue to work in Law Enforcement, putting their lives on the line every day.

On behalf of myself and the entire Blue Knight's and FOP board we wish all of you and your families a Merry Holiday season and all the best in the New Year. God Bless

TRI-STATE CONFERENCE NEWS

Our name is Jim & Karen Borza of PA 24 Gettysburg PA.

We are both retired Pennsylvania State Troopers.

I am running for International Treasurer and my wife Karen is running for International Secretary.

We are running for one simple reason, CHANGE... WE had so many Tri-State members tell us we should run for International Office because they believe we would be a great change. After some serious thought and watching how the current board acted between themselves and other members at the conference we agreed to run.

We have held our local chapter offices and sat and watched the club over the last 20 years. We observed the SAME members be in office and hold different positions and just move up between each other. Doing that doesn't get new ideas on the board just members who been together and grown to agree on matters.

I admit we are "NO COMMON NAME" you always hear in those names in current offices. But with that said, we are NEW, FRESH OPINONS coming to the table. We owe no favors.

We believe the elected board members are there to handle "Office Management" not make waves. Once the clubs administration duties are handled its time for what we joined the club for, riding motorcycles and exploring new adventures and making new FRIENDS.

Please pass this e-mail along to your members.

Feel free to contact us at:

To all TSC Chapter Contacts,

In an effort to help our TSC chapters deal with the aftermath of Hurricane Sandy, a fund has been set up by the TSC Executive Board to help chapter members with some of the costs they have incurred. The funds are meant for food, clothing, hotel or motel costs, etc. These fund are available to the chapters in need. The Chapter President or Vice President should contact our TSC Treasurer, Keith Bowers, and request needed funds. Any funds sent out by Keith will be sent to the requesting chapter for their disbursement to their members in need. The funds are limited and are the result of other BLUE KNIGHTS who have donated to this fund. It is important that the funds be used for emergency purposes only and not for things like insurance deductibles. The donations have only started coming in now, so we do not know how much money will be available for disbursement to any requesting chapters. All chapters who receive funds are asked to send a receipt back to the TSC Treasurer with a

brief general accounting of how the funding was used in order for the TSC to be able to account for the funding. All funding requests will be on a first come, first serve and availability of funds basis.

Please make your funding requests to Tristate Conference Treasurer:

Keith Bowers

522 N. Lincoln Ave

Jersey Shore, PA 17740

Cell: 570-279-7883

kebowers@hotmail.com

Requests can be made by phone, e-mail or snail mail.

Guy Cook
Vice Chairman
Tristate Conference

To all BLUE KNIGHTS,

We in the Tristate Conference have many of our members dealing with the aftermath of Hurricane Sandy. Some of the areas, our BLUE KNIGHTS members and family live in, were hit harder than others. The areas nearest the water were obviously hardest hit. But many inland areas were also hit hard. There have been inquiries by BLUE KNIGHTS Chapters and Conferences as to where they can send donations to help members of our conference. If any individual or chapter or conference wants to make a donation to help the members of the TSC, please send the donation check to our TSC Treasurer, Keith Bowers, 522 N. Lincoln Ave, Jersey Shore, PA 17740. He will distribute the funds to the TSC chapters who request financial assistance. If there are any funds left over after all requesting chapters have had their requests fulfilled, those fund would be donated to the Red Cross.

More information can be obtained from Keith Bowers at 570-279-7883, Gus Faella at 732-267-9434, or Guy Cook at 845-742-5946. Thank you.

Vehicle Make / Model: Model Year(s):
H-D / VRSCDX 2012-2013

Manufacturer: HARLEY-DAVIDSON MOTOR COMPANY Report Receipt Date: OCT 18, 2012
NHTSA CAMPAIGN ID Number: 12V503000 N/ANHTSA Action Number: N/A

Component: EQUIPMENT

Potential Number of Units Affected: 2,798

Summary:

Harley-Davidson Motor Company (Harley-Davidson) is recalling all model year 2012 and certain model year 2013 VRSCDX motorcycles manufactured from June 14, 2011, through August 1, 2012. The license plate bracket assembly's mounting screws may loosen and the assembly may separate from the rear fender. This condition may lead to contact with the rear tire which could cause the license plate bracket to rotate, possibly damaging the rear brake line.

Consequence:

If the license plate bracket contact with the rear brake line remains undetected, it may affect rear brake performance, increasing the risk of a crash, which could lead to injury or death of the rider.

Remedy:

Harley-Davidson will notify owners, and dealers will inspect and repair any affected motorcycles free of charge. The safety recall is expected to begin on, or about, November 5, 2012. Owners may contact Harley-Davidson at 1-414-343-4056.

Safety Officer's Report

Rich Hansen reports an article that he read suggests that some motorist, when driving their cars have a brief blind spot on their cars. The post to the left and right of the windshield. Considering that they are made bigger for support as well as also having air bags built into them they are big enough so that they create a blind spot for small vehicles like motorcycles (which are narrow). Something to think about.

The meeting was closed with the 50/50 drawing run by Kathie Nielson. Monica Mitchell drew the winning ticket and David MacDonald was the happy winner of \$50.

“You can get much farther with a kind word and a gun than you can with a kind word alone.”

We could use a few Road Captains, please send me an email or see me at the meeting.

In this club we are all Brothers and Sisters in Law Enforcement with the love for Motorcycles and enjoy riding. Adding this column to the news letter it will be a rides column for members taking over the road rides. Anyone going to any of the rallies Sturgis, Daytona or maybe taking a ride to Vermont for a weekend, Canada, Florida, A.C. or *wherever* and would like some company please let me know. Let me know what your plans are and I will post it with the dates and your itinerary.

Right and Left Turns

Different risks, different realities

By: James R. Davis

If all you had to do was ride in a straight line, almost anybody could handle a motorcycle. But in the real world we have to negotiate turns with our bikes. While it is convenient to think otherwise, it is simply not accurate to believe that making a right turn is exactly the same as making a left one except for direction. There really are different risks and realities involved.

For example, in all countries where we ride on the right side of the road, right turns are sharper than left turns, while the reverse is true in the other countries. (This article will focus on the US road model.)

That means that right turns are harder to negotiate than left turns at any given speed. It also means that in addition to being harder to negotiate, if you mismanage the turn and go wide, you will find yourself in a lane of traffic that is running in the opposite direction. In a left turn situation that you mismanage you will find yourself off the road entirely.

Which is more dangerous is largely a function of chance.

If, for example, there are no oncoming cars when you mismanage a right turn, at least you remain on pavement and have the chance of recovering from going wide, but any oncoming cars present you with a head-on collision as an alternative.

Running off the road in a mismanaged left turn may not be worse than taking a tumble, but it could very well involve falling off a mountain.

While making right turns involves greater lean angles at any particular speed than a corresponding left turn, there is usually **MORE TRACTION** available in a right turn than when turning to the left. This, because most roads are crowned. Thus, while turning to the right the road is cambered into the turn while turning left it is cambered away from the turn.

Left turns effectively provide you a narrower lane for use by your motorcycle. That is, because you must lean a motorcycle in order to make a turn, you cannot ride as far to the left within your lane when making a left turn as you might like without dragging your head or left grip across the center line and into the path of oncoming traffic. Unless there is a retaining wall involved, motorcycles can use their entire lane width when making right turns.

Making a right turn at an intersection is **FAR LESS** dangerous than making a left turn at that intersection. The most obvious reason being, of course, that you do not have to cross the path of any

oncoming traffic to do so. (As an aside, a pedestrian crossing the street at an intersection is FAR LESS at risk if he keeps the center of the intersection to his right rather than to his left because immediate danger comes only from his left and less immediate danger comes from easily visible sources.)

Turning left has two other dangers that are not present when making right turns: (1) The possibility that your side stand is down and, because most road surfaces are crowned, (2) you cannot lean a bike as far in a left turn as you can in a right turn without dragging some part of the motorcycle against the pavement.

One final thought: If you make a left turn across an oncoming traffic lane your danger is not restricted solely to that oncoming traffic. Before you actually make your left turn you must do a head check to the left to insure that someone is not trying to pass you on the left! If you are struck by that passing vehicle **YOU ARE TO BLAME** as you have performed an unsafe lane change!!!!

Ride Safe my Friends.
